

# JOINT PRACTICE FRAME

## Construction Notes

---

Hello and thank you for downloading the plans for the joint practice frame! Before getting stuck into anything, I would just like to note that these plans were provided to me by Jamie Ward who was the course leader for Furniture at Warwickshire College until late 2019. So I cannot take credit for designing this.

Jamie's Instagram: <https://www.instagram.com/jamiewardfurniture>

That said, this is the perfect introduction for someone wanting to get into hand cut joinery. In fact, it is a variation of a test you will likely get assigned while studying at a Furniture Making School that focuses on hand craft.

You can make this test as difficult or as easy as you would like by either starting with planed timber or starting with rough timber. Alternatively you could:

- Limit the amount of tools you use.
- Use woods that are more challenging to work than others.
- Set yourself a time limit

Upon successfully completing this project, I would recommend moving onto my Free Online Woodworking School where you will learn everything you need to know to get started in woodworking!
